SUMMARY

Computer Science undergraduate skilled in Flutter, Node.js, and Python, with experience in full-stack development and machine learning-based applications. Strong foundation in data structures, problem solving, and building scalable, real-world projects.

EXPERIENCE

Technical Team Member

SAIC

- Contributed to event-based web and app development as part of the technical team.
- Participated in multiple hackathons, improving teamwork and rapid prototyping skills.
- Led two group projects, overseeing planning, execution, and coordination.
- Served as Logistics Head for a major college event, managing operations and resources.

PROJECTS

Multi-Vendor E-commerce App | *Flutter, Node.js, Express, MongoDB, Riverpod, Cloudinary, Redis* 🐙 [Repository](#) 2026

- Developed a full-stack multi-vendor e-commerce mobile application enabling multiple sellers to manage products, inventory, and orders.
- Designed and implemented scalable RESTful APIs using Node.js and Express for user authentication, product management, and order processing.
- Integrated MongoDB for efficient database management and implemented schema design for users, products, and transactions.
- Utilized Riverpod for robust state management and built responsive UI components in Flutter.
- Optimized performance using Redis caching and integrated Cloudinary for image storage and retrieval.
- Implemented secure authentication and deployed backend services.

IPL Score Predictor | *Python, XGBoost, Flask, Pandas, Scikit-learn* 🐙 [Repository](#)

2025

- Developed a machine learning model using XGBoost to predict IPL match scores based on match conditions.
- Performed data preprocessing, feature engineering, and one-hot encoding on historical IPL datasets.
- Achieved strong prediction accuracy with RMSE of approximately 16 runs and R^2 score of 0.67.
- Built a Flask-based web application to provide real-time predictions.
- Serialized the trained model using joblib for efficient backend inference.
- Implemented an end-to-end ML pipeline from data processing to deployment.

TECHNICAL SKILLS

- **Languages:** C++, Python, Dart, SQL
- **Frameworks & Tools:** Flutter, Node.js, Express.js, Flask
- **Databases:** MongoDB, MySQL
- **Technologies:** REST APIs, Machine Learning, Data Analysis
- **Developer Tools:** Git, GitHub, VS Code

EDUCATION

Thapar Institute of Engineering and Technology (TIET), Patiala

2023 – 2027

Bachelor of Technology in Computer Science

CGPA: 8.1

- Completed projects using Dart, Flutter, Python, and AI/ML technologies.
- Active participant in technical clubs and coding contests.

Kendriya Vidyalaya SSTPS, Suratgarh

2021 – 2022

Class XII (PCM)

Ranked 1st

- Achieved top rank in the institution with strong performance in Physics, Chemistry, and Mathematics.

Leadership

SAIC

2024 – 2025

Logistic Head

TIET

- Led logistics operations for large-scale college events, ensuring smooth coordination and execution.
- Managed resources, vendor coordination, and on-ground teams to streamline event workflows.
- Collaborated with multiple teams to plan and execute events efficiently under tight deadlines.
